

Sometimes the perfect design requires the perfect fabric to go with it, and such is the case with the [Shahara Chaise](#). The "demo" fabric it comes in shows off its elegant curves and sassy tassel in a way I can't imagine any other fabric doing. Although it works well, it's such a specific look I'm not sure how many people will actually be able to make it fit in their homes, but for those who can: you should. Cost \$2,395. Plus, you'll get to say "Shahara Chaise" a lot, which is just pleasing to do. (And no, they don't mean Sahara, I checked.)

sit. painter. sit.

The guys over at [Bertendennis](#) have an awesome design for an eating nook called Sit Painter Sit that looks amazing but doesn't take up much space. The hype text is a little confusing because it says "just hang the paintings on the wall and sit, and you can even paint on it if you wish." So I'm assuming that means you can hang the table and chair pieces on the wall (like, hanging, say, a painting) then sit on them, and possibly even paint while you're sitting on them. Or you can paint them. Or both. Anyway you read that, this is great and I want one! It's not completed yet, sadly. Hopefully soon!
